

Assessing a Deaf Child's ASL

June 22-24, 2017

**Gallaudet University Campus
Washington, DC**

Through a transdisciplinary approach, participants will:

- apply various sign language assessment tools.
- explore ways of assessing young children's language and learning at home and in educational settings.
- identify and discuss appropriate assessment approaches to meet the language and literacy needs of diverse children.

This training is beneficial to mentors and professionals working with children between the ages of 0-5. Fluency in ASL is expected.

Seating is limited to 20 participants. Registrations will be accepted on a first come, first served basis.

REGISTRATION COMING SOON!
